

Institution: Colby College
Department: Department of Computer Science
Review Date: 15 January 2021
Starting Date: 1 September 2021

Colby College invites applications for two full-time Visiting Assistant Professor positions in Computer Science, to start on September 1, 2021. The term of each position is one year, with a possibility of a second year for one of the positions. Applicants must hold, or be close to completing, a Ph.D. in computer science, computer engineering, or a related area. We welcome applications from all areas of computer science, but preference will be given to those who teach analysis of algorithms or artificial neural networks. Review of applications will begin on 15 January 2021 and will continue until the position is filled. Full consideration will be given to candidates whose materials are received prior to the review date.

Colby College is a highly selective, comprehensive liberal arts college in Waterville, Maine. The department offers a major and a minor in computer science and participates in CS+X majors in Computational Biology, Environmental Computation, Computational Psychology, Interdisciplinary Computing [IC] Theater and Dance, and IC Music. Students pursuing these interdisciplinary majors take a mixture of CS courses and courses in their focus area. The department also supports a Data Science Minor and several other majors, including Biology, Physics and Astronomy, and Mathematics and Statistics. Colby Computer Science is involved in several multi-disciplinary initiatives in Computational Biology, Data Science, investments in computing and network infrastructure, and partnerships with the Jackson Laboratory and the Bigelow Laboratory for Ocean Sciences.

The Colby CS program is an outward-facing program designed to integrate with and take advantage of its liberal arts environment. In addition to providing the foundations of a CS education, our core courses focus on the applications of computer science across the arts and humanities, social sciences, and natural sciences and mathematics.

The department is well-equipped with computing facilities including a large teaching lab, student project spaces, a research lab with linux workstations, and a centralized research compute cluster. In addition, we have a strong connection with the University of Maine through the Maine Research Network [MEREN] for access to high performance computing and storage facilities. For more information about the CS department, faculty, and courses, please see the department web site at <http://cs.colby.edu>.

The teaching load for each position is 5 course equivalents per year. The courses taught will typically include a mixture of core CS courses and upper level electives. Since these are sabbatical replacement positions, we are seeking to hire individuals who can teach courses in the areas of those on sabbatical. Specifically, we are looking for candidates who teach theory (e.g. analysis of algorithms) or neural networks.

Application Instructions: Interested candidates should have three *confidential* references submitted electronically from their referees to Interfolio and provide the following materials as PDFs: a cover letter highlighting their qualifications for the position, a CV, a statement outlining their teaching philosophy and experience, a list of courses they would like and are qualified to teach, and a statement of research interests that includes how undergraduate students could participate in their research program. All materials must be submitted electronically to Interfolio <https://apply.interfolio.com/79642>. Competitive candidates will address how they will support the interdisciplinary programs, situate themselves in a CS department at a small liberal arts college, contribute to increasing the diversity of the CS program, engage in inclusive teaching, and participate in the larger academic community. Questions about the position should be directed to the chair of the search committee, Stephanie Taylor (computersciencesearch@colby.edu).

Colby is a private, coeducational liberal arts college that admits students and makes employment decisions on the basis of the individual's qualifications to contribute to Colby's educational objectives and institutional needs. Colby College does not discriminate on the basis of race, color, gender, sexual orientation, gender identity or expression, disability, religion, ancestry or national origin, age, marital status, genetic information, or veteran's status in employment or in our educational programs. Colby is an Equal Opportunity employer, committed to excellence through diversity, and encourages applications from qualified persons of color, women, persons with disabilities, military veterans and members of other under-represented groups. Colby complies with Title IX, which prohibits discrimination on the basis of sex in an institution's education programs and activities. Questions regarding Title IX may be referred to Colby's Title IX coordinator or to the federal Office of Civil Rights. For more information about the College, please visit our website: www.colby.edu
