

main.py

Add new function right()

```
1  from turtle import *
2
3
4  def shapeA():
5      forward(100)
6      forward(100)
7      forward(100)
8
9
10 def shapeB():
11     forward(200)
12     forward(200)
13     forward(200)
14
15 Shape A()
16 exitonclick()
17
```

Symbol look up table: where to look to find function commands.

main.py table

Function name

Shape A

Shape B

right ← will add this soon

turtle table

Function Name

forward

backward

right

left

...

from turtle import *
Means take all functions in the turtle symbol table and dump them into the Main Symbol table
